LUCKY NAMES · FREE PRINTABLE

Is It Actually Rare?

A one-page way to check, using real US records.

01 Find its rank

- ○ Look up the name in official US records
- ○ A rank is its place in line: number 1 is the most common
- ○ Lucky Names shows this rank for any name

02 Read the rarity scale

- ✦ Top 300 is common, however rare it feels
- ✦ 300 to 1,000 is familiar, not rare
- ✦ 1,000 to 3,500 is quietly uncommon
- ✦ Beyond 3,500 is truly rare: under 1 in 80,000 babies

03 Check which way it is moving

- ○ Rising fast? It will not stay rare for long
- ○ Steady or falling? The rarity will hold
- ○ Rare across the US can still be common in your town

Rare is a number, not a vibe.
